**OTHER INFORMATION****Branches:**

UFI Hydraulic Divisioni is working in more than 60 countries with a network of qualified distributors, with branch offices in India, Korea and China.

CERTIFICATION**PRODUCTS**

UFI Hydraulic Divisioni is the arm of the UFI Group dedicated to hydraulic filtration, specialized in designing, manufacturing and marketing of a comprehensive line of reliable, high efficiency hydraulic filters for mobile and industrial applications:

Suction filters (tank-immersed, in-line, tank-top and in-tank), Return filters (in-line, tank top and tank insert),

High pressure filters (also in stainless steel version, in-line and manifold mounting), Transmission filters, Air filters, breathers and air sentry, Clogging indicators, Accessories, like filling breathers, level gauges and float switches, Portable filtration unit, Alternative filter elements to the main OE, OES and independent aftermarket requirements.

UFI filters meets the hydraulic system requirements of maximum protection, with high efficiency and constant stability, thanks to high performance materials and micro-fibre filtration media, according to the market and technology demand.
